How Does EXION Work?

Skin

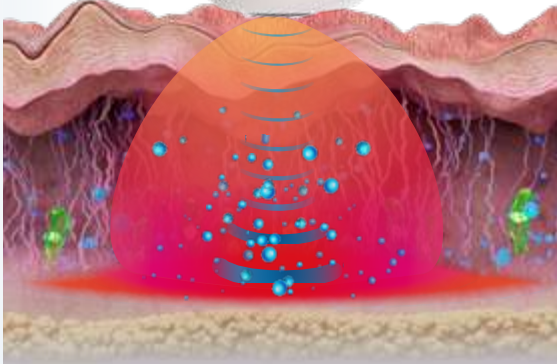

Utilizing a patented combination of Monopolar Radiofrequency and Targeted Ultrasound to effectively stimulate deep skin layers.

This stimulation promotes the production of collagen, elastin and hyaluronic acid to target skin laxity and enhance the overall skin appearance across the body.

How Does EXION Work?

Fat

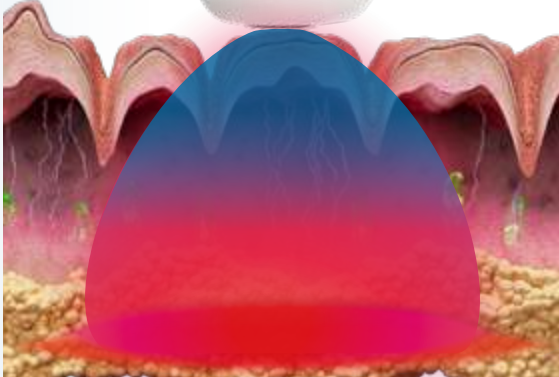

The active cooling protects the skin and allows the radiofrequency heating to reach fat cells below.

Such heating initiates the body's natural process to break down and eliminate unwanted fat cells, resulting in reduction of stubborn fat pockets.

REDUCTION*

FAQ

Who can benefit from the treatment?

Anyone looking to enhance their skin's appearance or reduce localized fat can benefit from the treatment, regardless of age or skin type. It is recommended to consult your provider to determine if this procedure is suitable for you.

What areas can be treated?

A total of 14 areas across the whole body including arms, abdomen, love handles and banana rolls.

Is there any downtime?

No, there is not. You may resume back to your daily routine right away.

How does the therapy feel like?

The procedure is known to be highly comfortable and even relaxing, according to some. While you may feel warmth in the area being treated, it's typically painless.

How fast will I see results?

Based on available studies, best results can be usually seen 3 months after the treatments.
