**Paola, 32, CA**

“It was a great experience and I’ve noticed the difference and my husband noticed the difference as well.”  
**Kim, 45, TX**

## Who is this procedure right for?

This procedure is a great option for women who desire non-surgical improvement of vaginal laxity and sexual dysfunction.

## How many treatments do I need?

Three treatments scheduled once a week are recommended. Usually, internal treatment takes eight minutes and external treatment is based on your specific needs, but generally less than fifteen minutes.\*\*

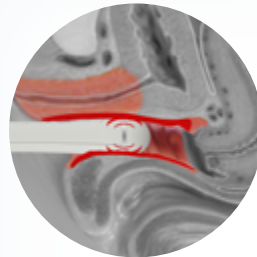

## What does the treatment feel like?

You might feel pleasant and comfortable heat. Following the treatment, you may notice mild redness and swelling in the treatment area. This usually disappears within a few hours. You may resume normal activity immediately afterward.

## How fast will I notice results?

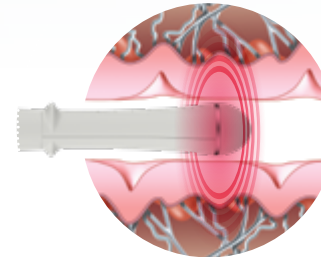

You may observe improvement after a single session. The results will typically continue to improve over the next few weeks.\*

## How does it work?

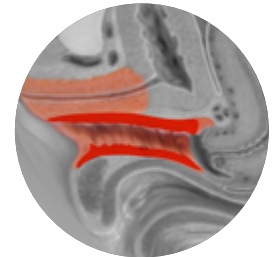

### Before

The tip is inserted through the introitus inside the vaginal canal, moving slowly alongside forward and backward.

### During

EMFEMME 360 uses unique 360° radiofrequency energy to gently heat the tissue and improve its condition.

### After

The heat helps to restore women’s intimate well-being without discomfort or downtime.
