

DIGITAL PEEL

Pixel Perfect: Your Skin Renewed

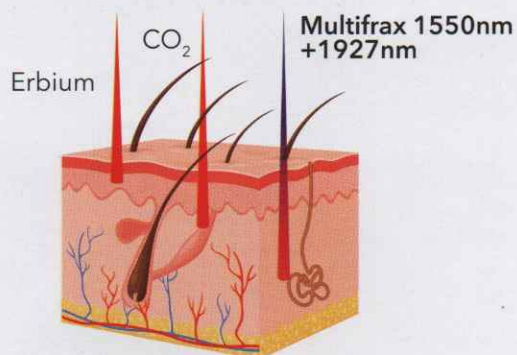

DIGITAL PEEL ADVANTAGE

Digital Peel laser technology is the pinnacle of aesthetic advancement: this versatile device delivers unparalleled results for multiple skin indications:

- Pigment lightening
- Melasma management
- Collagen remodelling
- Hair regrowth
- Skin tone rejuvenation
- Stretch mark lightening
- Pore reduction
- Neck rejuvenation
- Hand rejuvenation
- Skin glow
- Transdermal infusions
- Laser peeling

THE SCIENCE BEHIND THE TRANSFORMATION

The heart of **Digital Peel**'s transformative power lies in **Fractional Photothermolysis**, powered by Multifrax technology.

Fractional microbeams are delivered into the skin, to trigger fresh collagen, fractionally removing unsightly pigmented spots and opening channels for transdermal delivery.

Before

After

After 1 session of **Digital Peel**

The allure of **Digital Peel** lies in its precise control over the different penetration depth, all while ensuring the surrounding tissue remains unharmed.

Enjoy all the benefits of **total skin renewal** with almost zero downtime.

FAQ

1. Who can benefit from Digital Peel?

Digital Peel is FDA- and CE-approved for multiple skin conditions and concerns, including melasma, pigmentation issues, wrinkles, collagen remodelling, improved skin quality, pore reduction, acne scars, and even hand and neck lines.

2. Is Digital Peel safe for all skin types?

Yes it is because **Digital Peel** doesn't rely on skin tone but water content for laser absorption, making it effective for everyone.

3. How many sessions are typically required for visible results?

For best results, we recommend three sessions done monthly.

4. What is the expected downtime?

Digital Peel requires minimal downtime. You can return to your daily activities immediately after treatment. Some tiny, temporary spots may appear on your skin, which will naturally shed in 6 to 10 days.

5. Are there any potential side effects?

Temporary skin darkening for the first few days is possible.

6. Can Digital Peel be combined with other treatments?

Digital Peel can be combined with other treatments like fillers, Botox, LED light therapies, and skin-enhancing products to further enhance your skin's health.

7. How long do results last?

After just one treatment, collagen continues to remodel over the next three months, providing lasting skin improvements and preventing rapid collagen degradation.

8. How do I prepare for a Digital Peel treatment?

Avoid chemical peels for at least a week before and after treatment, and cease the use of retinoids for five days. Follow your doctor's guidance for post-treatment care to ensure the best results and minimise potential side effects.

THE DIGITAL PEEL PROMISE

Digital Peel presents the world's first patented one shot double wavelength laser combining 1550nm and 1927nm

TRANSFORMATIVE

Compact and powerful

EFFECTIVE

Minimise discomfort and downtime
