

LOVE YOUR SKIN WITH
SKINVIVE™

Triple aquagel
technology¹

Hydration is the foundation of healthy-looking skin²

Hydration affects:

How skin looks²

Visual attributes like pigmentation, redness and lack of radiance²

How skin feels²

Topographic attributes like lines, roughness and dryness²

How skin moves²

Mechanical attributes like sagginess and crepiness²

Did you know?

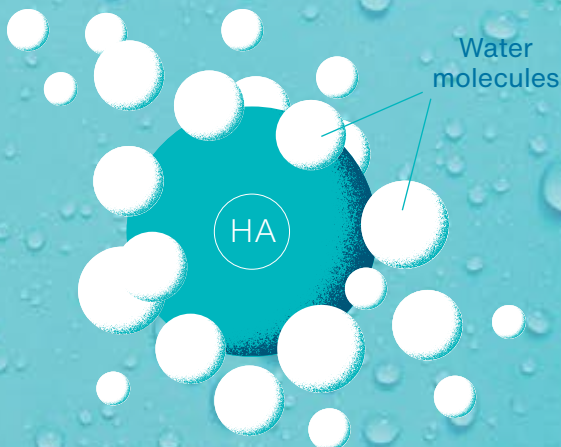

Skin health is an important factor when considering aesthetic treatments as it can affect overall outcomes.³

Hyaluronic acid plays a major role in skin hydration⁴

Hyaluronic acid (HA), a natural substance found in skin,⁴ has the ability to attract and bind to more than 1000 times its weight in water,⁴ keeps skin hydrated.

HA also enhances skin firmness and elasticity.⁴

The amount of HA is reduced as we age or with prolonged sun exposure, leading to dry skin and the appearance of fine lines.⁴

Meet SKINVIVE™

The injectable HA that delivers
up to 9 months of deep hydration
and radiance in ONE TREATMENT.^{5,6}

US FDA approved⁷

The triple aquagel effect of SKINVIVE™ on skin

Long lasting hydration

Using patented Vycross™ Technology, the HA in SKINVIVE™ locks moisture in skin for longer period of time.⁶

Hydration from within

SKINVIVE™ increases the presence of aquaporin 3 (AQP3), a water regulating molecule, which transports water and glycerol into the skin cells.¹

Improved skin texture

SKINVIVE™ improves collagen density, which may help to revitalize skin texture.¹

Treatment results

BEFORE

AFTER 1 MONTH

Courtesy of Dr. Wei-Ting Chang, Taiwan

36 year-old female

Skin is brighter, firmer and more radiant.

Volume of SKINVIVE™ in the cheeks: 4ml + 1ml (touch up)

BEFORE

AFTER 1 MONTH

Courtesy of Dr. Melvin Tan, Singapore

48 year-old female

Skin is firmer and brighter, fine lines around the eyes are smoothened out.

Volume of SKINVIVE™ in the cheeks: 3ml

with SKINVIVE™

BEFORE

AFTER 1 MONTH

Courtesy of Dr. Sylvia Ramirez, Singapore

34 year-old female

Skin is more hydrated, fine lines are reduced.

Volume of SKINVIVE™ in the cheeks: 3ml

BEFORE

AFTER 8 MONTHS

Visible results at 8 months
with 1 treatment.

Individual results may vary.

Hear what patients said about SKINVIVE™

Skin feels more plump and firm,
looks more radiant and hydrated.

68 year-old female, Singapore

Fine lines have reduced and
pores are getting smaller.

40 year-old female, Singapore

It is easier to apply makeup
and it stays on longer.

37 year-old female, Philippines

My tear troughs have
improved and I look
less tired.

54 year-old female, Malaysia

My skin remained hydrated
and didn't peel when I visited
a cold country after my treatment.

27 year-old female, Singapore

Individual results may vary.

Love your skin with SKINVIVE™

1 simple boost

The skin quality injectable that lasts for 6 to 9 months with 1 treatment.⁵

Long-lasting results

Improves skin hydration, radiance and smoothness for 6 to 9 months.^{5,6}

Minimal downtime

91% of patients were satisfied 1 month after treatment.⁶

9 in 10 patients would recommend SKINVIVE™ to a friend.⁶

After treatment care instructions

What to do

- 💧 Massage injected area to smoothen any lumps.⁸
- 💧 Apply cold compress to minimise bruising.⁹
- 💧 Use sunblock.⁹
- 💧 Increase water intake for 48 hours after treatment.⁹
- 💧 Expect results to take 5-10 days to be visible. Individual results may vary.⁹
- 💧 Book your next SKINVIVE™ treatment in 6 months to keep your skin looking healthy.

What to avoid

- 💧 Do not use any makeup during the first 12 hours after SKINVIVE™ treatment.⁸
- 💧 Avoid extended exposure to sun, sauna sessions and temperatures below 0°C for 2 weeks after treatment.⁸
- 💧 No strenuous activity for the first 24 hours after treatment.⁹

Frequently asked questions

Does the treatment hurt?

SKINVIVE™ contains lidocaine to reduce discomfort during treatment. Your doctor may also apply ice or a numbing cream to make the treatment more comfortable.⁸

Are there any side effects?

SKINVIVE™ is usually well tolerated. As with all injections, there may be injection site redness, pain, swelling, firmness, lumps or bruising. In most cases, these are temporary and should resolve within a week.⁸ Consult your doctor for more information.

Which skin types are suitable for SKINVIVE™?

SKINVIVE™ is suitable for a diverse range of skin types.⁹

Can SKINVIVE™ be combined with other aesthetic procedures?

SKINVIVE™ can be used as a foundational treatment for other aesthetic procedures including botulinum toxin injections, dermal fillers and skin tightening.⁹
